Summary — Detail-oriented and analytical B.Tech student specializing in Artificial Intelligence & Data Science with hands-on experience in SQL, Python, data handling, and backend systems. Skilled in working with databases, REST APIs, and extracting meaningful insights from structured data. Familiar with data analysis workflows, reporting, and problem-solving using SQL and Python. Currently expanding expertise in Excel, Power BI, and data analytics projects while gaining industry exposure at TBO.com.

Skills

Languages - Python, SQL, HTML, CSS
Frameworks - Django, Rest Framework
Databases - SQL, SQLite, PostgreSQL

Tools & Platforms - Postman, Git/GitHub, VS Code, IntelliJ IDEA, Maven

Experience

TBO.com

January 2026- March 2026

Software Development Engineer in Test (SDET) Intern

- Working on API and backend testing for hotel and travel-related services in a large-scale production system.
- Validating request-response workflows across UAPI and MSE layers.
- Performing manual and automated testing to ensure data accuracy, business logic validation, and service reliability.
- Debugging test failures and collaborating with developers to identify root causes.
- Gaining exposure to CI-friendly test execution, logs analysis, and backend service flows.

Qubitnets Technologies

August 2024- Jan 2025

Backend Developer Intern

- Developed backend systems for a customizable room decoration service based on user preferences and configurations.
- Implemented OTP-based user verification through the SMTP email server.
- Designed and managed a credit-based service model to control user access to premium features.
- Integrated PhonePe payment gateway for seamless online transactions.
- Integrated Google OAuth2 for secure and user-friendly login/signup.
- Collaborated on the development of a scalable, maintainable back-end system for a large-scale web application.

Projects

AI Event Concierge Platform

[Live Demo](#) / [Source Code](#)

- Tech Stack: Django, Django REST Framework, JavaScript, Gemini API, SQLite, Vercel, Render.
- Built a full-stack AI-powered application that converts natural language event descriptions into structured venue recommendations.
- Integrated Google Gemini API to generate intelligent responses including venue name, location, cost, and justification.
- Designed REST APIs for event generation and implemented data persistence for storing previous user searches.
- Developed an interactive frontend with loading states, animations, and dynamic rendering of results and history.
- Integrated external APIs to fetch venue images and improve user experience.

Pixora - Social Media Platform (In Progress)

Tech Stack: Django REST Framework, SQLite/PostgreSQL, GitHub

- Designing and implementing RESTful APIs for social media features (posts, likes, comments, follows, profiles).
- Building private/public account logic to ensure secure access control for followers and following lists.
- Developing scalable backend architecture with modular apps for authentication, posts, and interactions.
- Collaborating on integration of a transaction-based credit system for premium features

Education

Maharshi Dayanand University

Bachelor of Technology in Artificial Intelligence & Data Science

Sept 2022 - Present

Oxford Senior Secondary School

Senior Secondary School (CBSE)
