Summary — Skilled **Software Developer** with over **1+ year of experience** in designing and developing scalable applications. Experienced in building efficient systems, developing **RESTful APIs**, managing databases, and integrating third-party services. Proficient in writing clean, maintainable code and optimizing performance across diverse technologies, with hands-on experience in Python backend and full-stack development.

Skills

Languages Python, JavaScript, HTML, CSS

Tools Git/GitHub, Docker, Postman, VS Code

Frameworks Django, Flask, React, NestJS, Tailwind CSS

Concepts FastAPI, REST APIs, Oops, Data Processing, Backend Architecture, Testing

Databases PostgreSQL, SQL, SQLite

Experience

Qubitnets Technologies

Aug 2024 – Aug 2025

Backend Developer Intern

- Developed scalable backend modules for an e-commerce platform using Django and PostgreSQL.
- Integrated SMTP-based OTP login, Google OAuth2, and PhonePe payment gateway.
- Automated background tasks and cron jobs using Celery and Redis.
- Contributed to building maintainable, production-grade architecture.

Wadhwa Consultancy

Sept 2025 – Dec 2025

SDE Intern

- Developed a multi-tenant NestJS application with integrated APIs and optimized backend workflows for efficient data management and scalability.
- Collaborated on building an ERP portal using Django and Flask, focusing on modular architecture and seamless system integration.
- Worked in a collaborative, Agile environment, contributing to code reviews, debugging, and backend deployment processes.

Projects

StockInsight - Micro SaaS for Stock Prediction

[Source Code](#)

- Tech Stack: Django, TensorFlow, Docker, Stripe, Telegram Bot, Tailwind CSS
- Built a micro-SaaS for next-day stock price prediction using LSTM models and Django REST API.
- Integrated Stripe for subscriptions, Telegram bot for predictions, and Docker for deployment.

YouTube Data Collector

[Source Code](#)

- Tech Stack: Python, Flask, PostgreSQL, YouTube Data API, SQLAlchemy
- Built a scalable Python-based platform to collect and analyze YouTube channel and video data.
- Developed backend services and data pipelines for API integration and PostgreSQL storage.
- Implemented API key rotation and modular architecture for reliable data processing.

Education

Maharshi Dayanand University

Bachelor of Technology in Artificial Intelligence & Data Science

Sept 2022 – May 2026

Oxford Senior Secondary School

Senior Secondary School (CBSE)

April 2020 - 2022

Certifications

Python Crash Course, Google (Coursera)

[Certificate Link](#)

Django Framework, Udemy

[Certificate Link](#)

Postman API Fundamentals, Postman
